

Algorithm for Maintaining Bone Health in Individuals with Non-metastatic Cancers

*Bone mineral density assessment should not be conducted more than annually. BMD, bone mineral density; DXA, dual-energy x-ray absorptiometry; FRAX, WHO Fracture Risk Assessment Tool; GnRH, gonadotropin-releasing hormone; IV, intravenous.

ASCO® Guidelines

This algorithm is derived from recommendations in the Management of Osteoporosis in Survivors of Adult Cancers with Nonmetastatic Disease: ASCO Clinical Practice Guideline. This is a tool based on an ASCO® guideline and is not intended to substitute for the independent professional judgment of the treating physician. Practice guidelines do not account for individual variation among patients. This tool does not purport to suggest any particular course of medical treatment. Use of the guideline and this tool are voluntary.
