2023 Evaluation and Management Changes: Inpatient, Observation, and Discharge
Updated April 2024

Code Family Combination

In calendar year 2022, initial, subsequent, and discharge codes for hospital-based evaluation and management services are divided into two categories: observation and inpatient services. The American Medical Association (AMA) adopted changes to these services beginning in January 2023 which combined observation and inpatient services into one code set. Observation CPT® codes 99217, 99218-99220, 99224-99226 were deleted as of January 1, 2023.

Inpatient and Observation Evaluation and Management Services

All inpatient or observational services are reported with the following CPT codes:

<table>
<thead>
<tr>
<th>Service Type</th>
<th>Initial</th>
<th>Subsequent</th>
<th>Same Day</th>
<th>Discharge</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPT® codes</td>
<td>99221-99223</td>
<td>99231-99233</td>
<td>99234-99236</td>
<td>99238-99239</td>
</tr>
</tbody>
</table>
An admission stay encompasses both observation and inpatient services; a change in status does not account for a new stay. When admission occurs during an encounter at another site of service (such as an office setting), the services associated with the other site may be reported separately.

**Initial Versus Subsequent Services**

Historically, initial hospital services were reported on the date of admission, typically by the admitting physician. Any services performed on other dates occurring after the date of admission were reported with subsequent service codes.\(^1\) In 2023, the definitions of initial and subsequent services were revised for consistency with the guidelines for office and outpatient evaluation and management services.\(^2\)

Initial services mirror the definition of a new patient and would be reported if a patient has not received any professional services during the stay from the physician or other qualified health care professional (QHP) or another other physician or QHP in the same specialty who belongs to the same group/practice. Subsequent services are like established patient visits as they would be used if a patient has received any services during the stay from the physician or other QHP or another physician or QHP in the same group.

**Time**

In 2021, the definition of time changed for office and outpatient services to include both face-to-face and non-face-to-face activities. Time for hospital services and other outpatient

services remained defined by face-to-face activities only and required counseling and coordination of care to account for more than 50% of the encounter.  

In 2023, all E/M services (except for Emergency Room visits) have time determined by face-to-face and non-face-to-face activities. The level of service can be selected by all time spent on the date of the encounter. The requirement of selecting a code based on time if the encounter was 50% counseling and coordination of care no longer applies. The time noted in the code description must be met or exceeded to report a specific code.

**CPT Guidelines: Calculation of Time Over Multiple Calendar Days**

**2023 Update**

If a service is continuous before and after midnight, all the time attributed to the service is applied to and reported on one date of service.

Example: if the service began at 11:00 pm and crossed the midnight threshold to 2:00 am, three hours would be counted and reported on one date of service.

**2024 Update**

CPT added guideline language to be more in line with that of the CMS calculation.

- Hospital/Observation services less than 8 hours: Report only from the initial hospital/observation codes 99221-99223.
- Hospital/Observation services greater than 8 hours and discharged on the same calendar date: Report from the admission/discharge codes 99234-99236. These codes are to only be used by the physician/QHP who performs both the initial and discharge services.
- Hospital/observation services greater than 8 hours and discharged on different calendar date: Report from the initial hospital/observation codes 99221-99223 and from the discharge management codes 99238-99239.

CMS Guidelines: Calculation of Time Over Multiple Calendar Days

CMS adopted CPT's revised definition of a calendar day for hospital services in the 2023 Physician Fee Schedule Final Rule with a caveat. For inpatient, observation, and discharge services reported to CMS, the billing practitioner may only bill one hospital initial, subsequent, same day, or discharge visit once per calendar date. CMS maintains their 8-to-24-hour policy as admissions and discharges may happen around the clock.

Example: The provider spent 1 hour of time with the patient and on other activities supporting patient care.

Reporting Scenarios

- Patient admitted at 11pm, discharged at 4am (less than 8 hours): Report 99222 (initial service). No discharge services would be reported.
- Patient admitted at 11pm, discharged at noon (more than 8 hours, less than 24 hours): Report 99234 (same day admission and discharge).
- Patient admitted at 11pm Monday, discharged on Wednesday (more than 24 hours): Report 99222 (Initial service) and the appropriate discharge CPT (99238, 99239) on date of discharge.

**Split (or Shared) Evaluation and Management (E/M) Services**

The Centers for Medicare and Medicaid Services (CMS) describe a split (or shared) visit as an evaluation and management service (E/M) that is performed “split” or “shared” by both a physician and non-physician practitioner (NPP) who are in the same group. CMS has not defined “group” at this time but will be monitoring claims and considering input from stakeholders regarding the description.

Split/shared visits may be provided to both new and established patients, and for initial and subsequent visits in the inpatient hospital and observation setting.

**Setting**
The split/shared services policies pertain to the facility and institutional setting, in which payment for services and supplies furnished “incident to” a physician or practitioner’s professional services is prohibited. Split/shared rules are not applicable in an office setting as “incident to” rules apply.

The applicable place of service (POS) codes is: Inpatient facility (POS 21), Emergency Department (POS 23), Outpatient On Campus (POS 22), Outpatient Off Campus (POS 19).

Definition of Substantive Portion

For calendar year 2023, the definition of substantive portion remains the same as in calendar year 2022:

1. One of the three key components (history, or exam, or MDM). The component must be performed in its entirety by the billing practitioner OR
2. More than half of the total time spent by the physician and NPP performing the split (or shared) visit.

In the 2024 updates, CPT guidelines for split/shared services indicates that split or shared service code level selection can be based on time or medical decision making with language directing how substantive portion based on medical decision making is to be determined. CMS has adopted this framework. Please see ASCO’s Split/Shared E/M Service resource.

</tr>
<tr>
<td>One practitioner must have face-to-face</td>
</tr>
<tr>
<td>contact with the patient (does not</td>
</tr>
<tr>
<td>have to be the billing practitioner).</td>
</tr>
</tbody>
</table>

Prolonged E/M Services

If the requirements for the both the primary E/M service and the prolonged service are met, the physician or practitioner who spent more than half the total time would bill for the
primary E/M visit and the prolonged service code (either HCPCS code G2212 or G0316). More information about prolonged E/M services in 2023 can be found in the “Important Updates to Evaluation and Management Services in 2023” on ASCO’s Coding and Reimbursement page.

Reporting

Distinct Time

If the practitioners jointly meet with or discuss the patient, the time may only be attributed to the practitioner who performed the substantive part of the visit (more than half the total time).

Modifier

When reporting a split/shared visit to CMS, modifier -FS must be appended to the appropriate code to indicate it’s a split/shared visit. CPT modifier -52 describes a reduced service and should not be used to indicate a split/shared service.

Documentation

To appropriately capture a split/shared visit in the medical record, the physician and NPP who performed the visit must be identified. The individual who performed the substantive portion of the visit (and therefore bills for the visit) must sign and date the medical record.

Reimbursement

Payment is made to the practitioner who performs the substantive portion of the visit. To report under the physician NPI (and therefore receive 100% of the PFS amount), a substantive portion of the visit must be performed by the physician. The service cannot be reported under the physician if the substantive portion was performed by the NPP.

Reporting Steps

When reporting a split or shared E/M service, consider three steps:
1. **Determine who provided the substantive portion of the visit.**
   
   2023: Either history, exam, or MDM or more than half the total time.

2. **Enter documentation in the patient’s medical record.**
   
   Identify both the physician and NPP that performed the service.
   
   Practitioner who performed the substantive portion of the visit must sign and date the medical record.

3. **Select the appropriate CPT code.**
   
   Append modifier -FS to the selected code.

---

**Reporting Examples**

**Example 1**

NPP spends **10** minutes with the patient

Physician spends **15** minutes with the patient.

Total time = **25 minutes**

The **physician** spent the substantive portion of the visit with the patient (more than half of 25 minutes). Therefore, the **physician** would report the service.

**Example 2**

NPP spends **20** minutes with the patient

Physician spends **10** minutes with the patient.

Total time = **30 minutes**

The **NPP** spent the substantive portion of the visit with the patient (more than half of 30 minutes). Therefore, the service must be reported by the **NPP** and NOT the physician. The payment for the service would be **85% of the PFS amount**.
Example 3

NPP spends 10 minutes with the patient

Physician spends 15 minutes with the patient.

Total Distinct time: 25 minutes (Physician performed the substantive portion)

The physician and NPP met for 5 minutes to discuss the patient (joint time).

Total Time: 25 minutes of distinct time + 5 minutes of joint time = 30 minutes

The physician spent the substantive portion of the visit in distinct time. The 5 minutes of joint time would be attributed to the billing provider (in this case, the physician).
